Did you know?

Facts on organ donation and transplant in BC

**#TakeTwoMinutes
and save a life**

One organ donor can save
eight lives.

01

If you live in BC, you must register your organ donation decision to have it officially recorded, either online or on a paper form. If you aren't registered, your family will decide for you.

02

You are more likely to need a transplant than you are to become an organ donor. Only 1-2% of deaths in hospital occur in a way that allows for organs to be donated.

03

Organ donation is considered only after all life-saving efforts are made. Two medical professionals, not involved in transplant, must declare death before organ donation can proceed.

04

Don't count yourself out. Register as an organ donor and let the specialists decide if your organs are healthy enough to be donated.

05

There is no age limit to register! You're never too old or too young to register. Anyone with a Personal Health Number can register.

06

You only need to register once, and please talk to your loved ones about your wishes.
